PROFILE

Fun, upbeat, and highly motivated creative type who has a **passion** for **Web Development** and a background in music! I believe in **working hard** to level-up my experience as a **web developer** by continuing to refine my skills while learning new technologies for my future success.

SKILLS & TECHNOLOGIES

HTML & CSS	JavaScript	Mongo DB	PostgreSQL	Git
SASS	jQuery	Express JS	Ruby	GitHub
Bootstrap	Node JS	Angular JS	Rails	CLI
Heroku	MVC	AJAX	Agile	Adobe CC

PROJECTS

- **Materials** https://quiet-journey-70591.herokuapp.com/users/sign_in

Materials Creative Co. is a website where a user can view t-shirts, find t-shirts, and have the ability to upload their own to demonstrate their awesome t-shirt style. This app was built using Angular Js on the front end with a Ruby on Rails back end.

- **Going Places** <https://goingplaces.herokuapp.com/>

Going Places was a group project consisting of 3 people where we had to simulate working with real clients to develop a city based travel application. Users of this website could make comments/post about what liked and didn't like about a certain city. Going Places is full Ruby on Rails web application.

- **KingTUT** <https://cryptic-spire-89756.herokuapp.com/users>

KingTUT is an app that stores a user's favorite video tutorials! KingTUT makes it easy to stay focused and organized when learning a new skill storing URLs in one place. Technologies used were JavaScript, Mongoose, Mongo DB, Express JS, Node JS, Git, GitHub and Heroku.

- **Trivia Game** <https://jaguarj.github.io/Trivia-Game/#>

Trivia Game is a spin-off on one of America's favorite trivia games, Jeopardy! The technologies here were, HTML, custom CSS, JavaScript, jQuery, and Bootstrap.
